Inhalt/Contents

Annaby MH, Freiling G: Sampling expansions associated with Kamke problems 163
Arendt W, Nikolski N: Vector-valued holomorphic functions revisited 777
Athanassopoulos K: On the Ruelle rotation for torus diffeomorphisms 225

Blancafort C, Elias J: On the growth of the Hilbert function of a module 507
Bunce LJ, Chu C-H, Zalar B: Classification of sequentially weakly continuous JB^*-triples 191

Chekanov YuV: Invariant Finsler metrics on the space of Lagrangian embeddings 605
Chu C-H → Bunce LJ 191

Dekimpe K, Igodt P: Polynomial alternatives for the group of affine motions 457
Delgado F, Galindo C, Núñez A: Saturation for valuations on two-dimensional regular local rings 519
Du J, Rui H: Ariki-Koike algebras with semisimple bottoms 807
Dykema KJ, Rørdam M: Projections in free product C*–algebras, II 103

Elias J → Blancafort C 507

Farber M: Absolute torsion and eta-invariant 339
Fottner H: A remark on the Puig correspondence and Thévenaz's lifting theorem 551
Freiling G → Annaby MH 163
Fukuma Y: On complex manifolds polarized by an ample line bundle of sectional genus $q(X) + 2$ 573

Galindo C → Delgado F 519
Gavarini F: Dual affine quantum groups 9

Hyry E, Korb T: Reduction exponents and the Gorenstein property of blow-up algebras 351

Igodt P → Dekimpe K 457
Isidro JM, Stachó LL: Holomorphic automorphisms of continuous products of balls 621
Izhboldin OT, Karpenko NA: Some new examples in the theory of quadratic forms 647

Jain SK, Singh AI: Quotient rings of algebras of functions and operators 721

Joglar-Prieto N: Rational surfaces and regular maps into the 2-dimensional sphere 399

Karpenko NA → Izhboldin OT 647
Kawata S, Michler GO, Uno K: On simple modules in the Auslander–Reiten components of finite groups 375
Koike S: Nash trivial simultaneous resolution for a family of zero-sets of Nash mappings 313
Korb T → Hyry E 351
Kramer L: The point and line space of a compact projective plane are homeomorphic 83
Kwak S: Generic projections, the equations defining projective varieties and Castelnuovo regularity 413
Kwapisz J: Cocyclic subshifts 255

Lim Y: Strict contractions of symmetric cones 407

Martínez J, Peralta AM: Separate weak*-continuity of the triple product in dual real JB*-triples 635
Michler GO → Kawata S 375
Mozzochi CJ: On the distribution of the eigenvalues of the hyperbolic Laplacian for $PSL(2, \vec{Z})$ 241

Nikolski N → Arendt W 777
Núñez A → Delgado F 519

Peralta AM → Martínez J 635
Peters C: Lawson homology for varieties with small Chow groups and the induced filtration on the Griffiths groups 209
Pisier G: The similarity degree of an operator algebra, II 53

Rørdam M → Dykema KJ 103
Ronan MA: Local isometries of twin buildings 435
Rui H → Du J 807

Samiou E: Flats and symmetry of homogeneous spaces 145
Sendra J → Sendra JR 697
Sendra JR, Sendra J: Algebraic analysis of offsets to hypersurfaces 697
Singh AI → Jain SK 721
Stachó LL → Isidro JM 621
Strickland E: Quotients of flag varieties by a maximal torus 1
Swanson I: Linear equivalence of ideal topologies 755

Thangavelu S: Local ergodic theorems for K-spherical averages on the Heisenberg group 291

Uno K → Kawata S 375

Wang JT-Y: Cartan's conjecture with moving targets of same growth and effective Wirsing's theorem over function fields 739

Xu F: Representations of indefinite ternary quadratic forms over number fields 115

Young TR: Entropy and rotation intervals for circle maps near saddle-node bifurcations 487

Zalar B → Bunce LJ 191
